

PROTECT OUR COAST

THE TRUTH ABOUT OFF-SHORE WIND

THE IMPACT TO MARINE LIFE IS DEVASTATING.

- High decibel surveys kill and injure sea life
- Offshore wind vessel traffic kills and injures marine mammals
- Severe disruption of marine mammal migration, feeding and breeding
- Birds killed by turbine blades
- Destroys underwater habitats

PHASE 1 : LOCAL
376 SQ. OCEAN MILES
END GOAL : STATEWIDE
4,483 SQ. OCEAN MILES

"Four whales die in 4 days:
Wind Farms are creating
death zones at sea".

PATRICK MOORE
Greenpeace Co-Founder

COMMUNITY & ECONOMIC IMPACTS

- Industrialization of our towns and harbors
- Significant increase in energy costs
- Severe negative impact to the fishing industry
- Damage to our tourism and coastal beauty
- 1000 ft. tall turbines visible from the shore

ENVIRONMENTAL IMPACTS

- Major carbon footprint with tons of non-recyclable waste
- Substations will utilize the federally banned process of once-through cooling
- Wind turbines use SF6, the most potent chemically reactive greenhouse gas
- Increased air, noise and light pollution from industrial ports
